

PRO FINISHED REV 4[®] XP

The Mercury Racing® Revolution 4® XP propeller provides extreme precision when dialing in multi-engine, stepped bottom performance center consoles (twin, triple, quad, and quint installations) and single-engine bay boats. The standard length exhaust tube, in addition to reducing the time-to-plane, also provides stern lift for maximum hull performance and an improved ride in a variety of conditions.

- Handcrafted by Mercury Racing Propeller Artisans
- Available in pitch sizes ranging from 13" to 27.5" (even and odd) and left and right-hand rotation
- Mercury® patented Performance Vent System® enables operators to dial-in their propeller for peak planing performance. A majority of Mercury Verado®, Mercury Pro FourStroke and MerCruiser® stern drive applications will use the Revolution 4 XP with all four vent holes plugged with solid PVS fittings.
