LAB FINISH

REVOLUTION 4[®]

The Mercury Racing[®] Lab Finished Revolution 4[®] propeller gives multi-engine stepped-bottom performance center console boats great planing performance, excellent mid-range punch and awesome top-end speed. Satin Finish versions offer a non-polished propeller with extra shape on the leading and trailing edges. Mercury Racing[®] propeller artisans hand blend the robust blades for peak performance in both outboard and sterndrive applications.

Four Step Process:

- Blade surfaces are thinned in specific areas
- Modify leading edge
- Tune trailing cup heights
- Zero Balanced for maximum efficiency

The stainless steel prop features the standard length exhaust tube, reduces time-to-plane and provides stern lift at speed for maximum hull performance and an improved ride in a variety of conditions.

The patented Mercury[®] Performance Vent System[®] (PVS) can be used to fine tune the amount of exhaust venting needed for quick planing in certain applications. In most cases Mercury Verado[®], Mercury Pro XS[®] FourStroke and MerCruiser[®] sterndrive applications will run the Revolution 4[®] XP with all four vent holes plugged with solid PVS fittings.
