

PRO, LAB, LAB SATIN FINISH

## VENTERA ${ }^{\text {m }}$

The Mercury Racing® Ventera propeller is designed to handle big outboard horsepower on the fastest high-performance center consoles, day cruisers and bay boats.

Exclusive to the Mercury Racing Profile Series, this four-blade propeller is engineered specifically to carry more load with greater efficiency at high speeds and in semi-surfacing installations. The Ventera features an increased blade diameter of 15 " and a new blade thickness curve to handle more power without sacrificing performance.

The Mercury Racing Ventera propeller is available in 18 to 27.5 pitch in half-inch increments for precise tuning of any application. Each prop is hand finished and zero-balanced by Mercury Racing propeller artisans. Choose the hand-finished performance of a Mercury Racing Pro Finished $®^{8}$ model or step up to the blue printed perfection of a Mercury Racing Lab Finished $®^{8}$ propeller.

The Flo-Torq HD modular hub kit is available for boats running over 65 mph .
