PROPELLER CASE

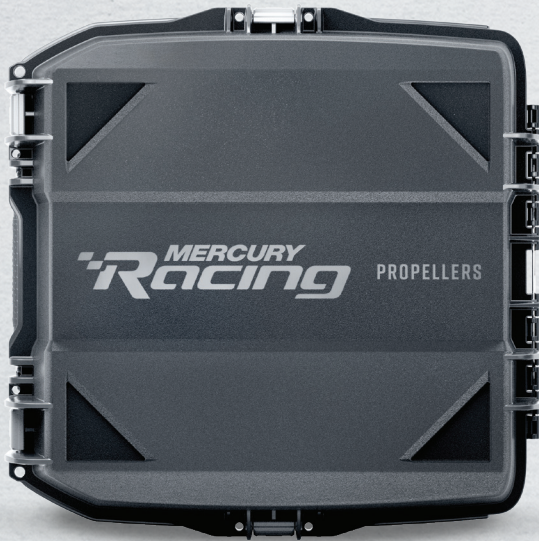

NEW DESIGN & FEATURES

The all-new Mercury Racing Propeller Case combines high-tech design and convenient features that complement our line of high-performance propellers.

The Propeller Case will ship standard with all new Precision Series CNC Cleaver propellers and is also available for purchase individually.

The Propeller Case has two different internal fixtures: one for M6 and M8 Drive Cleavers and one for Outboard Cleavers, including any other Flo Torq® hub-equipped propeller line.

The Propeller Case is designed to be as small as possible while still allowing space for larger 6-blade propellers. Designed with ergonomic handles, it also features latches that are injection-molded with military-grade construction and coupled with multiple locations for padlocks, to ensure your investment stays protected. For transporting propellers to the next race or stowing a spare set in a boat, the all-new Mercury Racing Propeller Case has a smaller form factor, and was designed for easier stacking to provide protection and convenience for performance boaters.
