

BRAVO I[®] OC

Outboard Propeller

BRAVO I OC

Originally designed for high powered, twin outboard performance catamarans, the four blade Bravo I OC is enhancing performance of 400R outboard powered flats cat boats as well. A shortened exhaust barrel settles the stern, providing a natural bow lift for reduced drag and enhanced speeds. Four new right-hand rotation pitch offerings (22.5", 23.5", 24.5" and 25.5") expand application of the OC into the niche single engine catamaran flats market in Texas as well. These go-fast cats will benefit from the smooth hole shot and increased top speeds from the Bravo I OC.

- Handcrafted by Mercury Racing Propeller Artisans
- Features a smaller overall diameter with added blade tip cups for improved acceleration and holding power throughout the engine RPM operating range
- Mercury[®] patented Performance Vent System[®] enables operators to dial-in their propeller for peak planing performance
- Available in pitch sizes ranging from 22.5" to 33" (even and odd) and left and right-hand rotation.

PITCH	RIGHT-HAND	LEFT-HAND
