PRO FINISH

# REVOLUTION 4<sup>®</sup> XP

The Mercury Racing<sup>®</sup> Revolution 4<sup>®</sup> XP propeller can be used to dial in with extreme precision the performance of multi-engine, stepped-bottom performance center consoles and single-engine bay boats. The standard-length exhaust tube helps reduce time-to-plane and provides stern lift at speed for maximum hull performance and an improved ride in a variety of conditions.

- Handcrafted by Mercury Racing Propeller Artisans
- The patented Mercury<sup>®</sup> Performance Vent System<sup>®</sup> (PVS) can be used to fine tune the amount of exhaust venting needed for quick planing in certain applications. In most cases Mercury Verado<sup>®</sup>, Mercury Pro XS<sup>®</sup> FourStroke and MerCruiser<sup>®</sup> sterndrive applications will run the Revolution 4<sup>®</sup> XP with all four vent holes plugged with solid PVS fittings.
