

LAB FINISHED REVOLUTION 4

Outboard Propeller

The Mercury Racing Lab Finished® Revolution 4® propeller offers great planing performance, excellent mid-range punch and awesome top-end speeds for multi-engine (trip, quad or quint) stepped bottom performance center consoles. New 20", 22", 24" pitch models, popular with the Mercury Verado 350 and Mercury Racing 400R outboards, expand the range from 19" to 25" pitch sizes in one inch increments.

Mercury Racing® propeller artisans hand blend the robust blades for peak performance in both outboard and sterndrive applications.

Four Step Process:

- Blade surfaces are thinned in specific areas
- Modify leading edge
- Tune trailing cup heights
- Zero Balanced for maximum efficiency

The stainless steel prop features the Mercury® patented Performance Vent System® (PVS). PVS® enables the user to fine tune the amount of venting needed for quick planing. The standard length exhaust tube, in addition to reducing the time-to-plane, also provides stern lift for maximum hull performance and an improved ride in a variety of conditions.

A majority of Mercury Verado®, Mercury Pro FourStroke and MerCruiser® sterndrive applications will use the Revolution 4 with all four vent holes plugged with solid PVS fittings.

PITCH/DIA	RIGHT-HAND	LEFT-HAND
19"/14.63"	857026L55	857027L55
