

MAX 5

Outboard Propeller

The Mercury Racing MAX 5 propeller, developed and hand-crafted by the Mercury Racing Propeller Artisans, is designed for single and multiple engine applications including the 400R outboard and 600 SCi sterndrive. The Lab Finished MAX 5 provides a measurable reduction in propeller slip, (up to 12%). In fact, the MAX 5 prop is so efficient; builders are finding they can run it higher to take full advantage of engines fitted with the race-proven Sport Master gearcase.

New 15.25-inch diameter models offer 3-4%

reduction in slip compared to the 15.00-inch models on select outboard and sterndrive applications which benefit from elevated transom heights. One-half inch pitch offerings enable engines to be dialed-in to their maximum rpm operating range for enhanced throttle response, optimized cruise fuel efficiency and top speed.

The stainless steel prop features the Mercury patented Performance Vent System® (PVS). PVS® enables the user to fine-tune the amount of venting needed for quick planing.
